The Fraser Valley branch executive would like to congratulate the following registrants for completing their articling program requirements and obtaining their professional registration:

There are currently three articling registrants who have not yet provided a mentoring agreement in the Fraser Valley branch. I am pleased to report that most new articling registrants have been very proactive in securing a mentor and obtaining mentoring agreements within the required 2-month deadline.

The Fraser Valley branch executive would like to thank all the Professional Agrologists (PAgs) who have volunteered as mentors and have assisted articling registrants in their pursuit of their professional designation. We appreciate the continued support of current mentees and encourage any other Professional Agrologists (PAgs) to consider mentoring as a great way to network and earn professional development hours.
