

Areas of Practice

Agricultural Sector

1. Agricultural economics and trade
2. Agroforestry
3. Arable land evaluation, conservation planning and management
4. Crop development, production and management
5. Horticulture, apiculture, fruit, vegetables and turf development production and management
6. International development
7. Irrigation planning and management
8. Livestock development, production and management
9. Rural community development and support

Environmental Sector

10. Contaminated land assessment, remediation and decommissioning
11. Ecological land classification and mapping
12. Environmental impact assessment and mitigation planning
13. Environmental management systems and audit
14. Natural resource and forest management
15. Soil and land conservation, reclamation planning and management
16. Soil and terrain classification, mapping and land evaluation
17. Vegetation identification, assessment and management
18. Water resource planning and management

Agricultural and Environmental Sectors

19. Air quality monitoring and management
20. Bio-engineering and design
21. Greenhouse gas verification and management
22. Land negotiations, leasing and dispositions
23. Pest management and bio-control
24. Rangeland evaluation, conservation planning and management
25. Soil fertility evaluation and nutrient management
26. Waste, compost and manure management
27. Wetland and riparian area evaluation, conservation planning and management

Life Sciences Sector

28. Health and nutrition products, nutraceuticals
29. Renewable development: bio-fuels, bio-fibre, bio-energy

Food Sector

30. Food, beverage and feed development and processing
31. Food safety and bio-security
32. Functional foods

Practice Areas Common to All Four Sectors

33. Business management, investment, marketing and supply chains
34. Education, teaching and extension
35. Human resource and operations management
36. Regulatory support and consultation
37. Research, technology development, transfer and application

Others

38. Aquaculture
