

Peace River Branch Grasses Plant ID

This course is subsidized by the Peace River branch.

This workshop will focus on the identification characteristics for Grasses and Grass Like species found in BC and Alberta. It will focus on teaching the techniques for keying out plants and it is encouraged that participants collect a few specimens ahead of time with vegetative and seed head characteristics to use as part of the course to practice identification and to use in exercises in identifying parts of plants. One of the course materials used will be the Common Plants of the Western Rangelands field guides, but participants are encouraged to utilize the field guides of their choice and most applicable to their location. If there is time the course will also explore identification techniques of flowers, and willows. Presented on Zoom. Presenter: Steven Tannas of Tannas Conservation

Date: Friday, Nov. 27; 9:00 am - 4:00 pm (Mountain time)

Cost: \$10 pp. Limited to 25 participants. COMPLETE REGISTRATION FORM and email to admin@bcia.com

Available to BCIA registrants in Peace River branch until Nov. 20. After Nov 20, registration will be open to all BCIA registrants.
